Import grades in eClass/Moodle

A practical job aid for teaching assistants with gradebook access.

YOUR GOAL

Prepare the source, match users and map assessment columns. Check the preview before importing, then verify the result before releasing grades.

01 / Prepare your source

Export the gradebook for the enrolled roster and student numbers. Keep the original export and work in a copy. Use one header row, unchanged student numbers and calculated marks. In shared grading, import only your students. **Blank incoming cells can overwrite existing grades.**

02 / Find Import

Open **Grades**, then the **Grader report** dropdown. Under **More**, choose **Import**.

03 / Choose your method

CSV file. Save as CSV UTF-8. Choose **UTF-8** and **Comma**.

Paste from spreadsheet. Copy student-number and assessment columns with headers into **Data**. Keep **UTF-8**.

Choose **Upload grades** to open the preview and mappings. This first button prepares the preview. It does not finish the import.

Match. Map. Verify.

Two mappings connect the source data to the right learner and assessment.

04 / Identify users

Map from your student-number column, shown here as **Student_ID**. **Map to ID number**. Do not choose User ID.

▼ Identify user by

Map from	1	Student_ID ▼
Map to	2	ID number ▼

05 / Map assessment columns

Leave names and student numbers as **Ignore**. Map each assessment to its **grade item**, rather than its Feedback item. Use an existing item to update a column, or New grade item to create one.

▼ Grade item mappings ⓘ

Student_ID	Ignore ▼
First Name	Ignore ▼
Last Name	Ignore ▼
Assignment 2	Assignment: TA demo Assignment 2 ▼

06 / Check before importing

Check the preview count, identifiers, assessment names, scale and marks. Use the final **Upload grades** button only after checking. Read the result and resolve any failures.

07 / Verify in Grader report

Compare the result with your source. Check the first, last, highest and lowest marks, plus exceptions. Confirm visibility and record the posting date.

KEEP THE RECORDS IN THEIR TEACHING CONTEXT

Retain your backup and import copy. Keep full class gradebooks out of student-visible course sections.

Adapted from the October 2, 2026 Teaching Assistant Manual draft. Selected interface crops contain no student records or internal course links. Controls can vary by platform version and institutional configuration.
